

HOW TO DOWNLOAD FIRMWARE UPDATES FOR NAT-MCH AND NAT-EMCH (NATIVE-MINI/ -MINI-R1)

Please log into our new website at

<https://nateurope.com/login/> using the following credentials:

- USR: natmch
- PWD: natmch

You will then find a list of firmware versions, similar to what is available from our FTP server.

From now on, we will again create a mailing list for those customers who would like to be informed whenever a new firmware becomes available.

Due to data protection regulations, we have to ask you to go to

<https://nateurope.com/product/nat-mch/>

and click on the "register for Update" button.

You may share this with any interested colleague in your organization, as due to legal regulations they all need to register again.
